

MITIGATE MARKET RISK FOR THE CHANGING RETAIL SPACE

Save time, money and the stress with a more accurate load-forecasting platform that considers all the nuances of your changing portfolio. With more extreme weather events and an increase of EVs and rooftop solar, you need better data to mitigate market risk and inform effective hedging strategies.

AI-POWERED DEMAND FORECASTING PLATFORM BUILT FOR RETAILERS

Our award-winning machine learning models provide demand and supply analytics for every hour of every day – giving your portfolio the most accurate forecasts when it counts.

Short and Long-Term Forecasts

- 15-day forecasts **run hourly** to help with short-term position management.
- 5-year forecasts **run weekly** and help with long-term operational planning.

Position Management

Easily review all day-ahead and term hedges, with DAM clearing prices automatically included.

Fully-Automated Scheduling

Send bids based on the most-up-to-date forecasts for more accuracy.

Bottoms-Up Modelling

Derived entirely from your underlying meters, our forecasts use a blend of per-meter, bottoms-up techniques to ensure the most accurate forecasts for all time ranges.

Unique Multi-Model Weather Platform

Using a population-weighted grid of thousands of points, our weather forecasts are a key input to our algorithms.
